

# Streamline your vaccination rollout to housebound patients

Intelligent workforce deployment technology for the delivery of the Covid-19 vaccine to patients unable to attend a vaccination centre in person.

Quick and easy to implement

Already in use by NHS Trusts, PCNs and GP Federations

Delivers immediate logistical efficiencies

## Avoid vaccine waste with real-time appointments

Specifically designed to support healthcare providers manage the complexities of delivering the Covid-19 vaccination programme, Doc Abode intelligently allocates a schedule of patients requiring home visits for vaccination to the available workforce via a secure app based upon:

Location

Traffic conditions

Vial size

Workforce availability

### Route optimisation

Helping each healthcare professional deliver the greatest number of vaccinations in the time available

### Patient management

Automatically flags second dose or follow-up appointment scheduling to avoid missing patients

### Seamless communication

Messaging service to inform patients and/or carers of appointment times and to verify the identity of the visiting vaccinator

### Administrator control panel

For real time visibility of vaccination schedules and staff progress with the ability to edit or reassign routes if faced with unexpected staffing changes

### Integrated technology

Easily import staff availability from existing rota systems

### Rapid implementation

Module can be deployed and in use within **one** day, supporting vaccination programmes

### No ongoing license fees or hidden costs

Subsidised costs with a low one-off flat implementation fee, to support the delivery of the national vaccination programme

*“Coordinating the vaccination of 1500 care home residents and staff plus 800+ housebound patients is extremely time consuming. By using the Doc Abode app, we turned 10 days’ work into one simple click!”*

*“It was so easy to set up, configure and use. It saves time and reduces the pressure of having to manually plan and implement the visits.*

*“I wish we had access to the system at the start of the programme and I’m looking forward to running a totally app based system for the 2<sup>nd</sup> round of vaccinations and to also unlocking other (Doc Abode) modules for our core services.”*
